## Week 2 Challenge

The Goldilocks and Three Bears is a well known children's story and one that every child knows. But what if all the characters of the story were on Facebook? What would their profiles look like?

Your challenge is to create a Facebook profile for each character in the story as shown in Figure 1. At this stage, all you need to do is create the XML layouts for each character, in the coming weeks we will add the functionality to this app and link all the layouts together.
